GLOBECHEK™ PRESENTS AT 2018 TELE-OPHTHALMOLOGY & ARTIFICIAL INTELLIGENCE CONFERENCE

New York, NY, April 24, 2018– GlobeChek Enterprises, LLC announced today that its co-founder and CEO William J. Mallon, MD presented at the *2018 Tele-Ophthalmology and Artificial Intelligence Conference* that took place on April 6th at Philanthropy New York, 1500 Broadway. The Conference was chaired by Lama A. Al-Aswad, MD, MPH and Louis D. Pizzarello MD, MPH. Some of the brightest minds from across the world were assembled to discuss the current status and latest advancements in the field of tele-ophthalmology. While most of the existing technology has been centered on fundus photography (taking a picture of the back of the eye), GlobeChek™ seeks to combine the essential missing elements of a more thorough screening exam. At the conference Dr. Mallon discussed GlobeChek’s new eye screening system.

“We are honored that we were invited to participate in this groundbreaking symposium along with the brightest minds in tele-ophthalmology. The reaction to our state of the art mobile tele-ophthalmology solution was quite humbling.”

-William J. Mallon, MD, CEO and Co-Founder

Early diagnosis and referral for care are crucial to preventing vision loss. GlobeChek™ seeks to bring visual health awareness and screening exams to the large percentage of the United States population that currently does not receive eye care. GlobeChek™ aims to provide convenient, affordable, non-invasive, comprehensive eye screening, including visual acuity, auto-refraction, intra-ocular eye pressure, Ocular Coherence Tomography (OCT), and photographs of both the external eye and retina. The mission of GlobeChek™ is to enable health care providers to identify previously undiagnosed conditions, including asymptomatic glaucoma and diabetic retinopathy, and thereby allow earlier intervention. A certified GlobeChek™ Ophthalmologist will review

screening results and generate reports in accordance with the *AAO* and *American Association of Optometry* guidelines.

GlobeChek™ is currently patent pending in the U.S., Canada, Japan, Europe and other countries. GlobeChek™ technology is pending FDA clearance and is not currently available for sale.

About GlobeChek Enterprises, LLC. **GlobeChek Enterprises, LLC** was formed to develop and implement technology enabling a thorough screening eye exam. The company was founded by William J. Mallon, MD and Adam M. Katz, MD, two practicing Board-Certified Ophthalmologists with more than 40 years of combined experience. The goal of **GlobeChek Enterprise, LLC** is to provide convenient affordable access to eye screening exams in order to prevent asymptomatic people from losing vision.
